All – I understand that the meeting dates are set for the Region 1 Meeting here somewhere in or near Portsmouth. I have blocked off time and am looking forward to presenting the Portsmouth/Pease Tradeport case study either of the days. Also, I let Meghan know that if we can be of any assistance here locally just let us know.

Thanks – Brian

Brian,

I just wanted to let you know that we will be reaching out to you in the next week or so to further discuss your interest and potential involvement.

Thanks.

Dear Ms. Dunn and Mr. Scott –

Thank you both for responding to this. As you know, one of the wells serving the Pease Tradeport Water System here in Portsmouth was impacted by PFAS above the Health Advisory over four years ago. Since that time we have been actively working with the Air Force, the Pease Development Authority, the regulatory agencies and our community in response to all aspects of this contamination. We have worked with a large technical team to monitor and assess the extent of the contamination, explored treatment options, installed an activated carbon treatment system on two of the three wells at Pease impacted by PFAS, run pilots on alternative treatment medias, and researched other PFAS impacted public water systems to find out what their response to the contamination has been. We would certainly like to participate in the upcoming PFAS summit here in New Hampshire and are also willing to present our case study in how we have responded to the issue and lessons learned.

Please feel free to contact me directly if you would like to discuss further.

Thank you for your consideration.

Brian,

We are still working out details with EPA but the intent is to be as inclusive as space allows. We'll add you to the list of those wishing to attend and will let you know when we have more details.

Subject: Re: PFAS National Leadership Summit and Engagement

Thank you Brian.

I am not sure who is organizing the agenda at this point.

I am copying Clark Freise and Bob Scott to let them know about your interest in being involved in the regional summit. It does make sense as Pease was one of the first DoD sites where PFAS was addressed and it impacted three major water supply sources. Portsmouth's experience and assessment of the needs and challenges associated with PFAS should be part of the agenda.

Brandon - I tried to watch the live stream of the summit today. They only had the first hour of talks up on YouTube so I didn't get to see anything from the afternoon. I did see you and Andrea Amico in the photo of the audience that they had online. I guess they'll be having a local summit in NH June 25th and 26th. I'd like to be involved as I tried to get into the Washington one and was told it wasn't an open invitation.

Thanks - Brian
